

Z1 -> Triton/Karma Sounds

Enclosed are 4 banks of MOSS sounds for the Triton/Karma, converted from the Factory Preload of the Z1, the ZSC01 card and a special bank from the TrinityV3 release which emulates the SOLO-Tri preload (which emulated the Prophecy preload).

All the sounds have been converted and then “finished”, including effects, SW1, SW2 and the 4 realtime knobs assignments, making them completely playable as is.

The Banks are as follows:

TNZ1PR1 – the “A” Bank from the Z1 Preload

TNZ1PR2 – the “B” Bank from the Z1 Preload

TNZ1CR1 – the “A” bank from the ZSC01 card

TNZ1CR2 – the “B” bank from the ZSC01 card

SOLOTRI – the TrinityV3 emulation of the Prophecy preload, plus special INITMOSS settings for all the algorithms.

Special thanks to Chris Petti for the conversion work!

Enjoy.

Korg USA

Note: A number of these sounds are duplicates of the MOSS Preload Programs, which were originally selected from these same sources. But while the MOSS Preload offers 128 Programs, these banks total 640 sounds. Find your favorites and make some great music!
