

D1600mkII Operating System Version 1.05

Released June2004 © Korg Inc.

This list describes the additions, enhancements and fixes that are contained in this Operating System.

[Bug fix]

When using an expression pedal with the D1600mkII, in certain cases, the MAX/MIN values were not detected correctly. This has been corrected.

[Bug fix]

If the Level Meter parameter "PeakHoldTime:" was set to zero, the meters would not indicate when clipping had occurred. This has been corrected.

[Bug fix]

The names of certain parameters of the Insert Effect Preset Programs were not displayed correctly. This has been corrected.

END.
