

Voice Name List (PRODUCER.PCG)

About the PRODUCER.PCG file

PRODUCER.PCG contains a re-ordered version of the standard factory Programs.

When shipped from the factory, the sounds are presented in a mixed order, so that incrementing through Programs might call up first a piano, then a pad, then a drum kit, and so on. This factory preset order is stored on the disk as the file PRELOAD.PCG.

In the PRODUCER.PCG file, on the other hand, these same sounds are grouped by category. As you increment through the Programs, you'll find that all of the pianos are together, all of the pads are together, and so on. This lets you step through similar sounds by pressing INC and DEC, without using the Category window.

The Combinations are still in the standard factory preset order, but have been edited so that they refer to the correct Programs.

The arrangement of HD-1 and EXi banks is the same as in the standard factory order: HD-1 Programs are in banks INT-A through INT-E, and EXi programs are in banks INT-F, USER-C, USER-D, USER-E and USER-F.

You can load the PRODUCER.PCG file from the CD named "Restore CD 1/4."

For a complete list of the Programs and their ordering, please see the file PRODUCER_VNL.PDF. All of the other sound data, such as Combinations, Drum Kits, and Wave Sequences, are the same as in the standard PRELOAD.PCG file. For more information about these sounds, please see the file VoiceNameList.pdf.

Note:

- PRODUCER.PCG requires the EXs1 ROM Expansion samples. These are enabled by default, but if you've changed the EXs bank setup, you'll need to re-load them in order for the Programs to sound correctly.
- PRODUCER.PCG does not include the Programs for the EXs2 Concert Grand Piano.
- When PRODUCER.PCG is loaded, the factory demo songs, Preset Template Songs, and any user Combination or Song data created with the Program data from PRELOAD.PCG will not sound properly.
