

Grandstage 73/88

System Version 1.0.1

August 8, 2017

Changes Since Grandstage System Version 1.0.0

General

Improvements

Various small improvements have been made to the sound data.

Bug fixes

The overall stability of the system has been improved, especially when repeating program select operations a large number of times.

In rare cases, if a large number of voices were held via the damper pedal, switching Favorites might have caused audio glitches. This has now been fixed.

Panel Operation

Improvements

The operation of Split Point setup has been improved.

Bug fixes

If Transpose was set to a value, turned off, and then re-set to the same value, Transpose would remain disabled. This has now been fixed.

In addition to those listed above, various other minor improvements and bug fixes are also included in this update.
